25X1

Harry Raven and I discussed this paper. He
offer some suggestions:

- Break para 3 recommendations into separate
- Point out that memos like this one, usually
do not go to NFIB as an agenda item
- Perhaps, NFIB principle endorsement could be
obtained by [redacted] memo through TTIC
or NFIB secretariat
- if he wants this to be discussed at NFIB
it can be put on agenda
- ask him to indicate choice (you could
recommend a choice)
- Second point; tell the DCI what you are
not the right way to consider remedial
action and give him some choices
on a body to determine USG action
to remedy problem
- choice could be FBI, Justice, or
SA/CI [redacted]
- if you are uncertain about choice, you
could recommend that [redacted]
have the staff group to consider action
and to release you and TTIC

25X1

25X1

you may wish to get coordination from
DDO, DDI, and SA/CI before sending the next
version forward. If you do, I suggest a concluding
line on the memo stating that coordination.

Fred Thompson

DIRECTOR OF CENTRAL INTELLIGENCE
Technology Transfer Intelligence Committee

TTIC-C-027
30 April 1982

MEMORANDUM FOR: Director of Central Intelligence

THROUGH : Chairman, National Intelligence Council
Deputy Director of Central Intelligence

FROM : [REDACTED] 25X1
Chairman, Technology Transfer Intelligence Committee

SUBJECT : Transmittal of Requested Interagency Intelligence Memorandum
on "The Technology Acquisition Efforts of the Soviet Intelli-
gence Services" [REDACTED] 25X1

REFERENCES : (1) Memo to D/NFAC, DDO, and C/NIC; Subject: Soviet Science
and Technology Collection; dated 14 September 1981

(2) Memo to DCI and DDCI; Subject: Soviet Science and
Technology Collection; dated 7 October 1981

1. Action. Your approval of the recommendations below. [REDACTED] 25X1

2. Background. Your memorandum of 14 September requested a Community-wide assessment of the role of the Soviet intelligence services in acquiring US and other Western science and technology. The purpose of this assessment is to make senior officials of the US Government aware of the scope and magnitude of that role and its implications for US East-West technology transfer policy. [REDACTED] 25X1

On 20 October 1981, you approved a memorandum dated 7 October from the then-D/NFAC proposing that the Technology Transfer Assessment Center take the lead in producing the Community's assessment of the role of the Soviet and East European intelligence services in acquiring US and other Western technology. The resulting Interagency Intelligence Memorandum on "The Technology Acquisition Efforts of the Soviet Intelligence Services" (see attachment) was approved by your Technology Transfer Intelligence Committee on 21 April 1982. [REDACTED] 25X1

3. Recommendation. That you review and forward the attached Interagency Intelligence Memorandum to the National Foreign Intelligence Board for discussion and approval. Further, that you recommend the creation of an appropriate body to determine what action the US Government should take to
